

GideonSoft

Capture the Present –
Shape the Future

HUMANS ARE MORE IMPORTANT THAN HARWARE.

For over two decades GideonSoft, Horizon Performance's proprietary platform, has been the software of choice for the selection, assessment, and development of the U.S. Military's Special Operations community. Ten years ago, we expanded the same proven methodology into college athletics. Today, GideonSoft is used across multiple commercial and nonprofit environments with a simple result – increased retention, focused evaluations, tailored professional development, and greater team optimization.

MEASURE. IMPROVE. OVERCOME.

It's not just physical ability and personality traits that makes a successful team member. GideonSoft tracks the behavioral, physical, and technical competencies, as well as the intangibles of an individual's character. We create a holistic picture that helps you identify and develop the right people within fast paced, elite teams. We don't just collect data – we generate intelligence.

Collect & Review

Measure performance, record observations, import outside data, and execute focused self, peer, and leader assessments.

Monitor & Adjust

Monitor your team and individual trends. Identify challenges, make corrections, and adjust development to achieve the highest impact.

Analyze & Decide

Evaluate, compare, analyze, and interpret the results. Generate feedback cycles and shape decisions on relevant and refined data.

Our Purpose
Harness the power of **TEAMS**,
by, with, and through their **LEADERS**.
